AEROMAC DYNAMICS

AI-CEPTOR

DETECT. DECIDE. NEUTRALIZE.

AEROMAC DYNAMICS

AI-CEPTOR

DETECT. DECIDE. NEUTRALISE.

AI-CEPTOR is an advanced Counter-Unmanned Aerial System (C-UAS) designed for detection, interception, and neutralization of hostile drones.

Engineered for rapid response and high-precision engagement.

Built for modern airspace threats, it delivers reliable performance in high-risk, time-critical environments.

100 % Non-chinese
70% Indigenous

KEY FEATURES

- PRECISION STRIKE
- QUICK LAUNCH MECHANISM
- TARGET SURVEILLANCE
- MULTI MISSION FLEXIBILITY
- AUTONOMOUS MISSION
- SECURE & RELIABLE

BUILT FOR MODERN WARFACE

Military Operations

Border Security

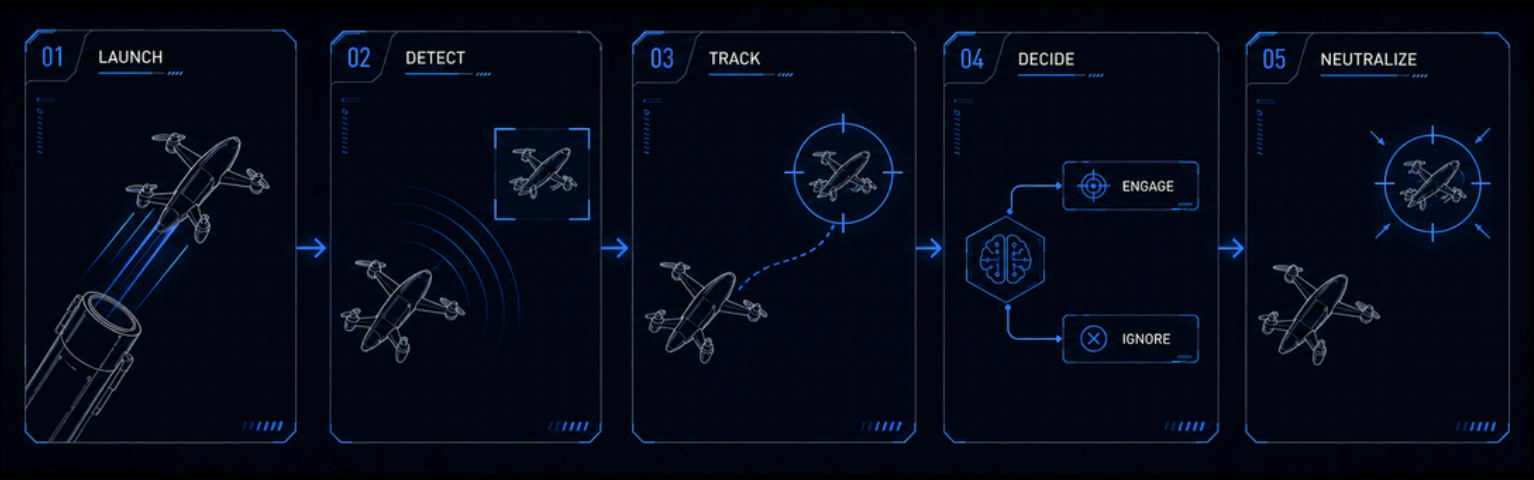

Critical Infra Protection

Tactical Reconnaissance

AEROMAC DYNAMICS

OPERATIONAL WORKFLOW

From detection to neutralization — executed with speed and precision.

TECHNICAL SPECIFICATIONS

PARAMETER	SPECIFICATION
Platform Type	Autonomous Counter-Drone Interceptor UAS
Endurance	10-15 minutes
MTOW	Upto 3 kg
Detection Range and Speed	1 Km and 300km/hr
Optics	Day and Night capabilities
Operational range & altitude	15km and 4500 m
Configuration	Quadrotor (FPV-based Interceptor Platform)
Deployment Method	Launcher / Manual Deploy

DETECT.

DECIDE.

NEUTRALIZE.

Stay ahead of aerial threats with

AI-CEPTOR
